Good. I don't think we have plans to post it anywhere. We did get a request from a senator. We will have to release it there. I wasn't told which one, I can find out, if you would like.

The commissioner of conservation has instructed me to inform you that we consider the report final, have posted it on our website, and issued news release. It is ok with us if EPA wishes to post the report elsewhere.

Again, thanks for all the assistance provided by your team.

Hi Joe, I hope you weathered the storm OK. We are just now getting some rain from Isaac. Too late to help the corn crops but we'll take whatever we can get right now. I think the grass in my yard is dead not just dormant. I completed the thermal map of the infrared image from the sinkhole area and added it to the concluding section of the draft report. I think it says what we already discussed on the phone but check it and include any suggestions with the rest of the comments you get.

We are closed today and tomorrow for the hurricane. I will distribute it internally for review when we reopen before we approve a final version.

---

Hello Greg,  
This preliminary report has been edited by the ASPECT team and includes comments from Joe Ball. If you need something else added or edited let me know and I will include it before finalizing.

9544071

Joe  
seemed to think it will be useful for situation reporting up the chain and public release. I had  
to leave  
the office due to the power failure and am trying to work from home. The Google  
Earth link is taking longer due to the power failure.
